

A REAL LIFT WHEN YOU NEED IT

Newly launched company FailSafe House Lifting BC Ltd recently completed their first house lift on the BC coast in Halfmoon Bay on the Sunshine Coast.

FailSafe BC utilizes its own innovative Atlas 5 House Lifting System. The system – which uses electrical, mechanical lifting – was recently granted a patent in both Canada and the United States and is the culmination of over nine years of extensive research, development, and testing.

“It is the safest and most secure way to lift a house found anywhere on the house lifting market today,” said Monty Wensel, FailSafe’s president.

FailSafe House Lift-

The new electrical house-lifting system was used at 8629 Redroofs Rd. in Halfmoon Bay to lift a water-front home while a new foundation is built under it.

ing Systems Inc. was established in Regina and recently expanded to coastal BC. In addition to offering house lifting services the company is

set to start manufacturing the house lifting system and make it available through a franchise model to contractors.
